DETAILED ACTION

Specification

1. The abstract of the disclosure is objected to because it contains the word "comprising" at line 4. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 13 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Marsh et al.

Regarding claims 13 and 18, Marsh et al. show all of the limitations of the claimed invention.

4. Claims 13-15, 17, 22-25, 28-30 are rejected under 35 U.S.C. 102(b) as being anticipated by Forbes et al.

Regarding claim 13, Forbes et al. show a stator element for use in a rotating electric machine that is preferably of the transverse flux type, characterized in that said stator element (Figure 19) is constructed having a single pole piece (63), a single flux-conducting section (59) and a single coil core part (157), all integral as one solid piece, with the flux-conducting section (59) between the pole piece and the coil core part.

Regarding claims 14, 15, 17, 19, 20, 22-25, 28-30, and 33, it is noted that Forbes et al. also show all of the limitations of the claimed invention.

Regarding claim 18, it is noted that Forbes et al. also show an opening (on side 155 for coil).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 16, 21, 26, 27, 31, and 32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Forbes et al. in view of Heidelberg.

Regarding claims 16, 21, 26, 27, 31 and 32, Forbes et al. show all of the limitations of the claimed invention except for it being shaped from pressure-formed and heat-treated iron powder material.

Heidelberg shows that it is shaped from pressure-formed and heat-treated iron powder material for the purpose of improving efficiency.

Since Forbes et al. and Heidelberg are all from the same field of endeavor; the purpose disclosed by one inventor would have been recognized in the pertinent art of the others.

It would have been obvious at the time the invention was made to a person having ordinary skill in the art to use iron powder as taught by Heidelberg for the purpose discussed above.
